Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a coating composition, classified in class 525, subclass 383+.
- II. Claims 22-24, 46-56 and 66-76, drawn to an alkyd coating composition and a method of making thereof, classified in class 523, subclass 500+.
- III. Claims 25-29 and 57-59, drawn to an acrylic coating composition, classified in class 524, subclass 502.
- IV. Claims 30-45 and 60-65, drawn to a concentrated additive and a method of using, classified in class 106, subclass 218+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II (and III) are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because an alkyd resin of Group II and an acrylic resin of Group III are not needed. The subcombination has separate utility such as a coating composition.

Inventions II and III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if

they are shown to be separately usable. In the instant case, invention IV has separate utility such as an additive for non-curing compositions. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group II-IV is not required for Group I-III, respectively, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
